

FOR IMMEDIATE RELEASE

## **Blos • Roses Introduces the FIRST Combo Station** **Blow Dry, Manicure and Pedicure Under an Hour**

**March, 2020 (Andover, MA) – [Blos • Roses](#)** is a concept like no other that bridges the gap between high-quality beauty services and time with the invention of the **FIRST** combo station - a blow dry, manicure and pedicure all done at the same time in 60 minutes or less! **3D Tour:** <https://my.matterport.com/show/?m=RtsPbuP19fp>

“We offer women quality services that are both fast and affordable, making it easy for the modern woman to balance it all!” says **Karolyn Henao, co-founder**.

**Diana Hernandez, founder**, used her expertise in design to deliver more than just a service for every customer that walks through the door, and her innovative concept is changing the beauty market in Miami. Women no longer have to compromise good service for lack of time – they can now have the power of a team working just for them! **VIDEO:** <https://www.youtube.com/watch?v=bMO53OlbeO0&feature=youtu.be>

The custom-built combo station is designed for the client to sit in a salon chair with a Freestylist Support System [suspending a blow dryer](#) above them. Then there is a stationary pedicure bowl and technician chair that stores supplies and a special manicure table (also with tech chair that stores supplies) that rotates around the client, hairdresser and pedicure technician. The execution by all three technicians resembles a well-rehearsed dance around the client.

Technicians have a two-week training period to learn how to work together and a detailed manual highlights where each one should physically start each service, rotate after 20 minutes...all the way to where each should be positioned at the end. Every detail is covered, down to how and when to part the guest’s hair to allow for transitions.

“This concept literally would not work if we didn’t have the Freestylist Support System, it allows all three technicians the ability to rotate around the station while ensuring our

guests receive superior services while feeling pampered,” says Henao. “People are so busy, and we have a lot of traffic here in Miami, so once women realize they can come to one place for all three services at the same time, they’re hooked!”
